rajputvanshika852@gmail.com | 7905171874 | [in LinkedIn](#) | [GitHub](#)

Computer Science student with knowledge of Data Structures and Algorithms, Web Development, and Ethical Hacking (CEH concepts). Experience in building web applications and understanding common security vulnerabilities. Interested in secure application development and problem-solving.

EDUCATION

BENNETT UNIVERSITY

B.Tech. in Computer Science

August 2023 - Present
Greater Noida, Uttar Pradesh

PROFESSIONAL EXPERIENCE

SocioNet

June 2025 – Sep 2025

Founding Team Member & Web Developer

Remote

- Frontend development using React (version 18) and Vite, and routing and authentication implemented using React Router DOM and Context API.
- Implementation of REST APIs using Axios and integration with the backend using database connectivity.
- Design of the UI using Tailwind CSS and management of the project repository using Git and GitHub.

TECHNICAL SKILLS

- Programming Languages : C++, JavaScript, Python, Bash
- Frontend Technologies : React.js, Next.js, HTML5, CSS3, Tailwind CSS
- Backend Technologies : Node.js, Express.js, RESTful APIs
- DevOps & CI/CD : Docker
- Databases : MongoDB, SQL
- Tools & Platforms : Git, Git Hub, Linux, Shell Scripting, Vercel

KEY PROJECTS

SocioNet - Full Stack Social Resource Exchange Application

- Designed a full-stack MERN-based application that is able to handle NGOs, hospitals, restaurants, and volunteers for effective resource management and donations.
- Designed a React-based application using React (with Vite), implementing routing and authentication for roles.
- Designed a scalable Node.js Express-based application, implementing a proper MVC architecture for API development.
- Implemented authentication, authorization, and effective REST API implementation for MongoDB.
- Implemented responsive design techniques using Tailwind CSS and extended the application to Android using Capacitor

HealthSync – A Complete Health Monitoring System – React,MongoDB,,Node.js

- Developed a health monitoring system capable of tracking various health parameters of the user including calorie intake, sleep habits, hydration level, BMI, etc.
- Designed specialized health monitoring systems for women, workout regimes in gyms, and posture analysis based on data analysis.
- Integration of the analysis module to help analyze the skin condition of the user and suggest ways to enhance it.
- A user-friendly approach that allowed me to develop a complete health monitoring system.

HONORS & ACHIEVEMENTS

- Reached a peak rating of 1413 on Code Chef platform, indicating expertise in competitive programming.
- Completed over 300 problems on LeetCode platform, indicating expertise in DSA and problem-solving concepts.
- Reached the level of obtaining the Certified Ethical Hacker (CEH) certification after gaining hands-on experience in penetration testing.
- The candidate has contributed to open-source codes, improving the quality of codes and collaboration practices.
